

## Connected eCommerce Experience :

# Zoho Magento Intelligent Automation

# SAPPER.

Build a connected eCommerce experience with Sapper's Zoho-Magento intelligent integration and automation. Find prebuilt automation helping you automate order fulfilment, order tracking, inventory management and track information between different systems. Extract customer information from CRM systems and create automatic shipments bills when a new customer is created in your eCommerce store.

The Zoho-Magento prebuilt automation helps you sync data between the two most popular applications. Sync Contacts from Zoho to Magento as customers, Sync Product catalogue from Zoho to Magento's backend. When a new order is created in Magento's storefront, Sapper syncs the customer information to data houses and simultaneously creates a sales order in Zoho and notify the relevant slack channels.

The complete journey of order-to-fulfilment could be automated using Sapper's intelligent integration and automation. It is as simple as connecting the dots.

### With such an intuitive and integrated platform, you can:

#### Intelligent Integration Automation:

- Automate the order to fulfilment process between the CRM system
- Integrate data quickly between CRM, communication systems and e-commerce platforms
- Maintain coherent data across all applications

#### Deploy Easily:

- Create and Publish API's internally or externally
- Create secure local connections with inhouse applications
- Scale flexibly to meet the needs of real-time
- Run cloud, on-premise or hybrid

The Sapper's API integration enables enterprises to integrate thousands of applications and create and deploy API's from existing systems.
