

GDPR Compliance:

Manage and Maintain Your Data According to GDPR compliance

SAPPER.

General Data Protection Regulation (GDPR) poses a challenge to large organizations. Data regulations are similar to existing data privacy policies. But the additional challenge here is you have to be geographically specific to the regulations you provide to the EU citizens. The need to provide these additional control over data, the enterprises need to go beyond their current data privacy systems.

With cloud solutions, the personal data of EU citizens including their IP addresses, cookies, contact information must be maintained according to the European GDPR rules. Organizations must also provide citizens with the control of their data and a right to forget. This can be difficult when the information is stored in clouds. As the cloud may not be integrated with all the tools an enterprise uses. Failing to comply with these rules could result in huge financial penalties and damaged reputation.

How Can Sapper help You?

Sapper provides an unparalleled platform to flexibly be compliant with the new GDPR rules and regulations. The ability to have a single group of employees manage data and automate most of these tasks is necessary. Sapper gives you the ability to manage and monitor data for both internal employees and external vendors. This additional control over their data gives both your employees and partners a sense of trust in your organization. Sapper's intelligent integration and automation gives you the ability to integrate new systems into GDPR compliance rules and you don't have to worry about maintaining compliance all the time.

With such an intuitive and integrated platform, you can:

Design Integrations:

- Connect any data sources
- Build customized workflows
- Integrate any application with AI
- Automate manual business process
- Intelligently map data fields

Deploy Easily:

- Create and Publish API's internally or externally
- Create secure local connections with inhouse applications
- Scale flexibly to meet the needs of real-time
- Run cloud, on-premise or hybrid

The Sapper's API integration enables enterprises to integrate thousands of applications and create and deploy API's from existing systems.

With such an intuitive and integrated platform, you can:

Manage from Anywhere/Any Device

- Manage from harmony cloud
- Provide secure access with user permissions
- Get Real-time notifications'
