Sapper for HealthCare

Enable Interoperable Healthcare with Intelligent Integration and Automation

SAPPER.

With Covid-19 pandemic, healthcare is undergoing a paradigm shift in terms of efficiency. A modern intelligent integration and automation platform can help the data flow quickly and securely. This intelligent integration and automation allows your healthcare staff to gain a holistic view of patient health and get the right data in front of the right people at the right time. With an enterprise level Intelligent Integration and Automation, interoperability among the apps can become easy. This ensures that you share data among teams through any system. Sapper intelligent integration and automation platform allows you to connect many healthcare portals seamlessly. Pharmacy, clinical research, medical IoT device, practice management and other several healthcare areas could use Sapper's expertise to integrate and create a healthcare data ecosystem.

Sapper Intelligent Automation enables you to:
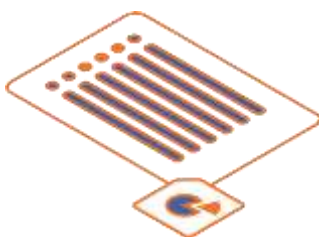

Design Automations:

- Connect any applications and data sources
- Rapidly build customized automations
- Integrate any application with Bots and AI
- Conversational UI for business users
- AI Enabled automapping of data

Deploy Easily:

- Run on any cloud
- Large library of prebuilt automations
- Create and publish APIs
- Scale flexibly to meet business demands

Sapper's Intelligent Automation enables enterprises to integrate applications, bots, AI systems and data

Manage from Anywhere

- Built in security and compliances that meet the highest industry standards
- Comprehensive monitoring, debugging and automation mining
- Enhanced operational and business analytics

Benefits: Sapper Intelligent Integration and Automation

- Single unified platform for application, Bots, AI and data automations. Lower cost of ownership and maintenance
- Accelerate innovation by deploying pre-built automations. Go from concept to production in hours.
- Conversational UI that helps business users interact with automations and systems
- Retail domain accelerators

Healthcare pre-built Automations

APPLICATIONS

- Electronic Medical Records
- Payor Systems
- Healthcare Interoperability
- Life Science ERPs
- Patient Portal
- Practice Management

and more…

Pre-Built Automations

- Healthcare Interoperability
- Revenue Cycle Management Automation
- Covid-19 Management
- Connected Patient Applications

DATABASES

- My SQL
- Oracle
- EMRs
- Snowflake
- And more

OTHER PROTOCOLS

- FTP
- REST
- SOAP
- LDAP
- SMTP/POP3
- JDBC/ODBC

DATA FORMATS

- JSON
- XML
- PDF
- CSV
- Flat/Hierarchical Text Structures
- and more
