Integrate ServiceNow:

Integrate ServiceNow for **Business Management**

SAPPER.

ServiceNow is an excellent tool for technical and business management support. It is widely used across the business process for IT service management, IT operations management, IT business management and a variety of customer interactions. But like every application, even ServiceNow has limitations. But combining ServiceNow with other applications can eliminate these inefficiencies. And that's what Intelligent automation does.

Sapper's intelligent automation can help you integrate ServiceNow to other on-premise or cloud applications. This way you can create automated workflows based on triggers. Sapper's pre-built automation can help you integrate ServiceNow with popular applications like Slack and Salesforce.

Intelligent automation can help you manage data confidentiality across devices, better customer support, real-time analysis and reporting, and improved operational tracking

The Sapper's intelligent automation enables enterprises to integrate thousands of applications and create and deploy API's from existing systems

With such an intuitive and integrated platform, you can:
Design Integrations:

- Connect any data sources
- Build customized workflows
- Integrate any application with AI
- Automate manual business process
- Intelligently map data fields

Deploy Easily:

- Create and Publish API's internally or externally
- Create secure local connections with inhouse applications
- Scale flexibly to meet the needs of real-time
- Run cloud, on-premise or hybrid

The Sapper's API integration enables enterprises to integrate thousands of applications and create and deploy API's from existing systems.
