

SAP Integration :

Connect your SAP systems Easily with your Digital Ecosystems

SAPPER.

Using SAP as their data recording tool is a norm for many organizations. However, the data recorded must be accessed by employees, vendors, distributors and suppliers. These long chain of users may be using some cloud-based applications that run independently from SAP. The IT teams struggle to connect these systems to SAP. While the business struggles with the incoherent process of data collection. With Sapper's intelligent automation, you can easily connect SAP to other cloud-based applications and expose SAP data on the web or mobile device using customized or pre-built recipes and API's integration enabled platform.

With Sapper's Automation, you eliminate the need of IT departments to build an ecosystem of data migration and cloud integration process. Businesses can continue working on their usual applications while also gaining new insights from SAP. Integration of on-premise applications into SAP allows you to gain complete visibility into SAP data anywhere, anytime from any device application.

With such an intuitive and integrated platform, you can:

Design Integrations:

- Connect any data sources
- Build customized workflows
- Integrate any application with AI
- Automate manual business process
- Intelligently map data fields

Deploy Easily:

- Create and Publish API's internally or externally
- Create secure local connections with inhouse applications
- Scale flexibly to meet the needs of real-time
- Run cloud, on-premise or hybrid

The Sapper's API integration enables enterprises to integrate thousands of applications and create and deploy API's from existing systems.

With such an intuitive and integrated platform, you can:

Manage from Anywhere/Any Device

- Manage from harmony cloud
- Provide secure access with user permissions
- Get Real-time notifications'
- Integrate intelligently across applications
- Manage your API's and view enhanced analytics
