How Intelligent Integration and Automation can Help?

Netsuite can be used efficiently if integrated with different applications. Meaning that your ERP system could be integrated with other systems like CRM's, communication tools etc.

With intelligent integration & automation, you can effectively manage tasks that fall under the purview of ERP systems and other applications associated with them.

Sapper's Pre-built Automations for Netsuite

Collaborate Netsuite and Box

● A new account is updated in Netsuite

● Sapper's intelligent integration & automation checks for the same information in Box folder

● If the info doesn't exist, Sapper creates a new folder in Box

● Sapper then invites collaborators from Netsuite to interact with the Shared folder as Viewer/Uploader.

Extract Netsuite Customers to Excel

● A new customer is created in Netsuite

● Sapper's intelligent integration & automation automatically extracts the information into Google sheets as a row

Connect New Users from Zendesk to Netsuite

● A new user is created in Zendesk

● Sapper searches for the same contact in Netsuite

● If no match is found, Sapper creates a new account
